

# Andgo UKG Solution Suite Overview

Andgo specializes in Intelligent Automation. We help organizations solve cumbersome scheduling practices by turning them into automated, configurable workflows.

## The Modules:

Andgo connects seamlessly with UKG to leverage & extend its capabilities and works directly with customers to configure workflows that fit and augment current processes.

## Solutions Guide:

Andgo offers a complete end-to-end solution perfect for complex scheduling environments. Our platform is designed to provide targeted high impact outcomes. Andgo's automation enables hundreds or even thousands of shifts to be triaged and filled simultaneously and automatically for UKG customers.

Streamline	Optimize	Communicate
 <p>I want to <b>streamline</b> absence onboarding (sick call outs) and inbound requests.</p> <p><b>WE RECOMMEND</b></p> <p>Quick Dial →</p> <ul style="list-style-type: none"><li>Automatically route inbound IVR phone requests (i.e. sick call-outs)</li><li>Prioritize incoming absences via dashboards for organization-wide insights</li><li>Direct integration with UKG to update relevant pay codes &amp; schedule in line with organizational requirements.</li></ul>	 <p>I want to <b>optimize</b> complex shift filling.</p> <p><b>WE RECOMMEND</b></p> <p>Smart Call →</p> <ul style="list-style-type: none"><li>Automates the process of identifying, communicating, and awarding shifts to the most suitable employee(s)</li><li>Supports complex, high-volume (i.e. union) environments. Fill hundreds or even thousands of shifts simultaneously</li><li>Enables employee shift requests and scheduling of open shifts</li></ul>	 <p>I want to <b>communicate</b> with targeted employee groups.</p> <p><b>WE RECOMMEND</b></p> <p>Inform →</p> <ul style="list-style-type: none"><li>Easily and quickly send targeted communications to curated employee lists</li><li>Employees can set preferences for how they want to be notified</li><li>Supports multi-modal communication streams (text, email, phone)</li></ul>

Andgo's Intelligent Automation Suite creates efficiencies and saves resources by automating major manual scheduling challenges, such as: absence onboarding, shift filling and broadcast communications.
