

Andgo | Automated Absence Reporting & Shift Fill

Andgo's integration & user experience is a seamless extension of your UKG scheduling environment. Your team won't even notice they are using a separate tool, as our modules are embedded directly in the UKG dashboard where they manage all of their workforce management tasks.

- ✓ 2x Award Winning UKG Workforce Management Technology Partner
- ✓ Cloud hosted two-way API Integration provides a seamless user experience
- ✓ Easily access Andgo via tiles in the UKG scheduling system dashboard

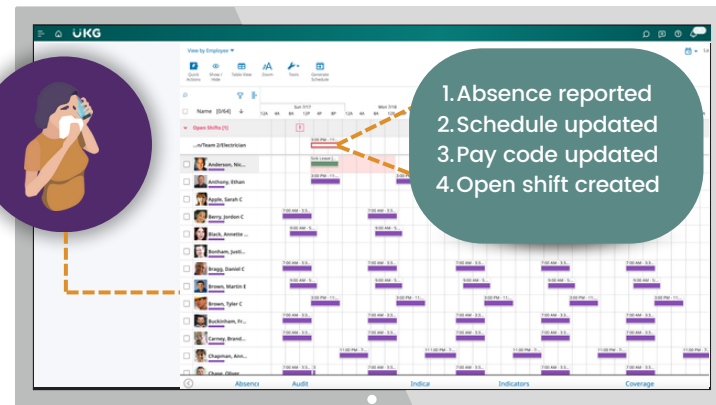

Andgo + UKG Pro WFM | Direct Integration Available Today

Meeting You Where You're At

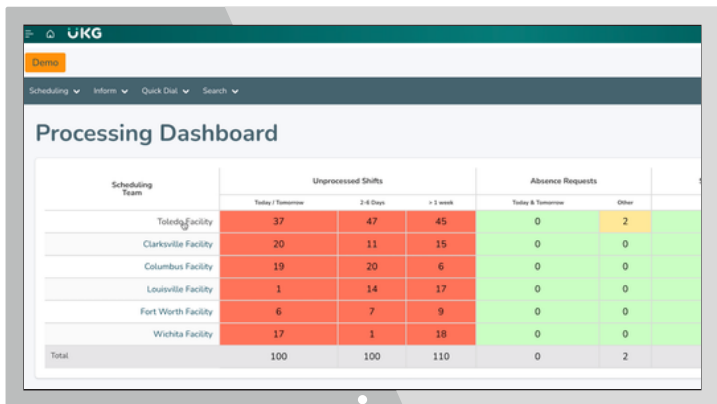

Access Andgo modules via the desktop & mobile UKG App.

1. Absence reported
2. Schedule updated
3. Pay code updated
4. Open shift created

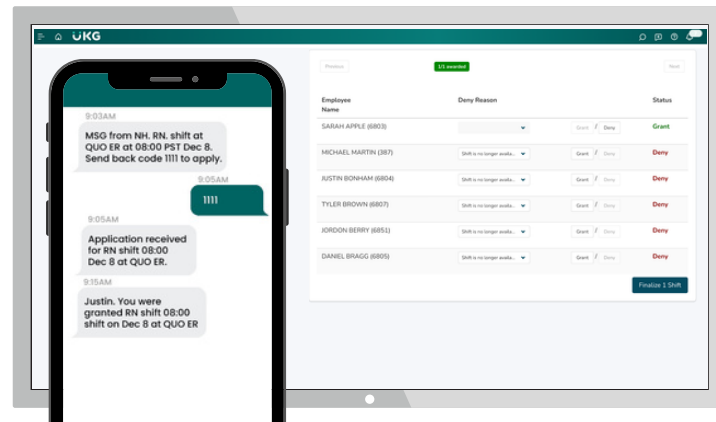

Automated Absence Reporting & Schedule Updates

Andgo's absence phone line (IVR) is directly integrated with UKG to automatically update employee schedules & pay codes.

Data Rich Dashboards

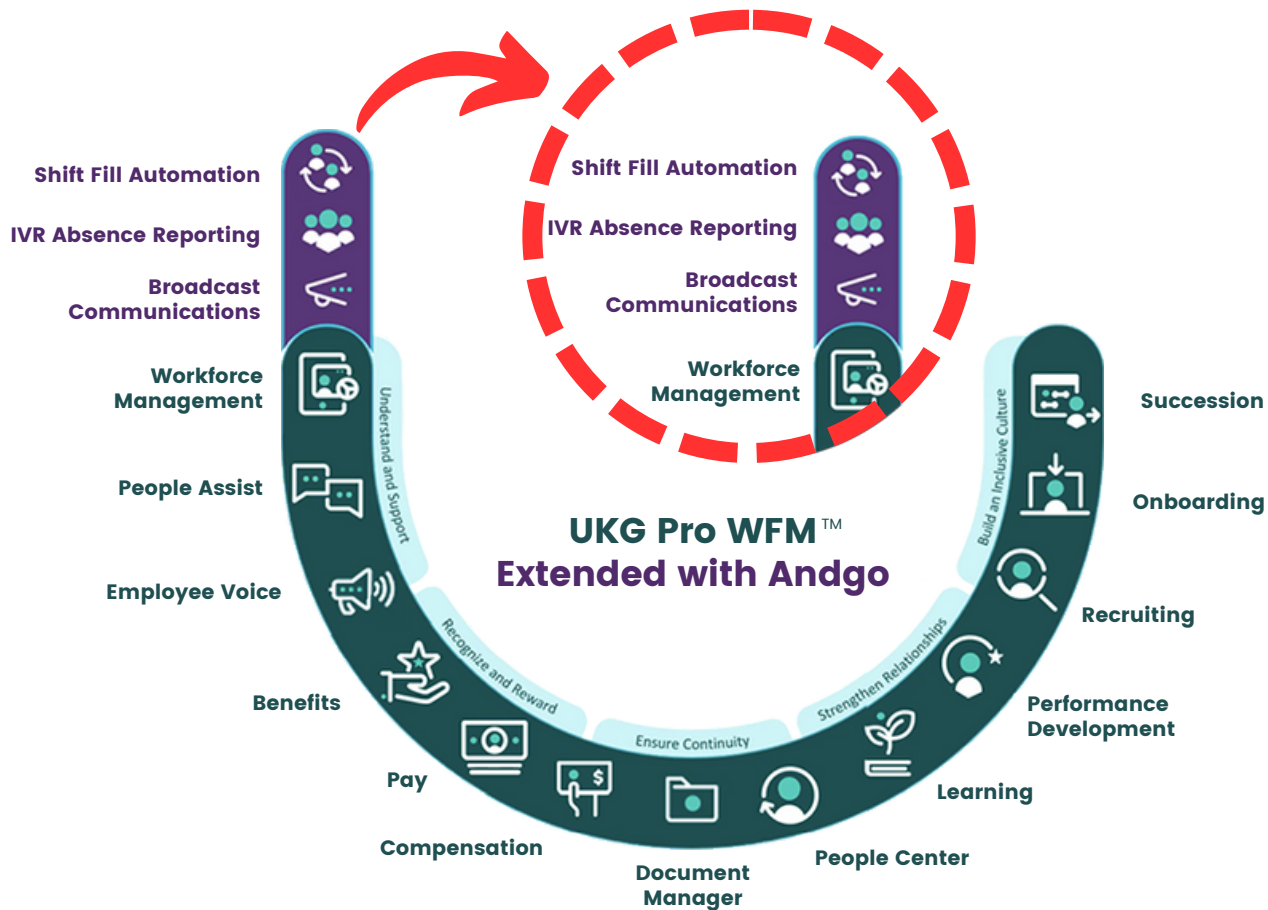

Centralized dashboard with absence insights to identify critical vacant shifts. Integrated directly with your UKG scheduling module.

Integrated Shift Bidding

Automated shift bidding capabilities at scale via SMS & phone to fill vacant shifts. Shift awarding integrated directly with UKG scheduling system for automated updates.

Andgo is a seamless extension of your UKG Pro Workforce Management™ environment
