34% of Nurses plan to leave their current role by the end of the year.

Millions of Dollars in over-reliance on costly travel nurses.

25% of Nurse Manager time is spent scrambling to fill open shifts.

#1 Concern amongst hospital CEOs is staffing.

7X Longer to process manual scheduling tasks.

No Transparency into real time movement of staff within the organization.

Lack of Visibility into more critical shifts (i.e. which ones need to be filled first).

Employee Dissatisfaction due to lack of flexibility/ownership over their schedules.

Intelligent Shift Filling Automation for High-Volume, Complex Scheduling Environments:

- Optimize internal resource first = reduced costs
- Increased transparency
- Reduced manual, tedious tasks
- Schedule flexibility = work/life balance
- Communication: Meet employees where they are
